DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: before paragraph [0001] the specification states “Technical Fiel” instead of “Technical Field” and in paragraph [0003] the acronym “MOD” is used, but it is not defined.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. **Claims 1-7** are rejected under 35 U.S.C. 102(b) as being anticipated by Erbil (US 4882206, supplied by applicant).

The claims are first directed towards a tris(sec-butylcyclopentadienyl) rare earth metal compound.

Erbil teaches an organometallic compound, tris(R-cyclopentadienyl)M (col 1, lines 45-60). The aliphatic R group is taught to preferably be an alkyl (col 2, lines 65-66) with 2-4 carbons (col 2, 59-61) of which sec-butyl is specifically taught (col 2, lines 62-64). The metal M group is preferably yttrium (**claim 2**) or lanthanum (**claim 3**) (col 2, line 1), though other rare earth metals, such as praseodymium (**claim 4**) and erbium (**claim 5**) are also specifically taught (col 2, lines 51-58).

Art Unit: 1792

2. Regarding **claims 6 and 7**, Erbil further teaches using these chemical compounds as suitable precursors for coating substrates with these metals by chemical vapor deposition (abstract). Conventionally, in chemical vapor deposition thin films are formed (**claim 6**) on a substrate by including a vapor of the chemical compound in a carrier gas flow, exposing a substrate to the chemical compound and decomposing the compound in order to form a film containing the metal from the precursor (**claim 7**) (col 1, lines 18-29 and col 5, lines 32-42).

Conclusion

3. No current claims are allowed.
